

SOFTWARE RELEASE NOTES

Release 3.08 Contact Support: (800) 776-1356

August , 2001

Installing the version 3.08 software on your RADAR:

Before you begin the upgrade, make sure you have a **backup of current sessions**. This is a standard precaution

To prepare your system for the upgrade, **choose "UPGRADE SYSTEM"** from the SYSTEM menu and answer "YES". When you press the enter key, RADAR will save all projects on the audio drive in a version-independent (upgrade) format. This operation will take a few seconds per project. When it is complete, the message: **TURN OFF POWER & BOOT UPGRADE S/W** will appear. If you have another audio drive, swap it into the drive bay, reboot RADAR, and repeat this step. Continue until all audio drives have put into upgrade mode.

To install the new software, **Insert v3.08 floppy disk #1** and reboot RADAR. After a few moments, the iZ logo will appear on the screen with the following message below it:

```
Install RADAR 24
v3.08? ENTR/CNCL
```

When you press the Enter key, RADAR will begin reading the software from the floppy disk, and the message will change to :

```
Installing RADAR
v3.08 Disk 1
```

After a minute or so, you will see;

```
Insert Disk 2
and press ENTER
```

Remove disk 1 and replace it with disk 2, and press the Enter key to complete the installation.

SOFTWARE RELEASE NOTES

Release 3.08 Contact Support: (800) 776-1356

August , 2001

Installing RADAR v3.08 Disk 2

After a minute or two, you will see the following message briefly, and then RADAR will start automatically.

Install Complete
Running RADAR 24

When RADAR starts up, all projects will automatically be upgraded to version 3.08 format. This operation will take a few seconds per project. If you have another audio drive which you put into upgrade mode in step 3, unmount the current drive, swap the next audio drive into the drive bay, and mount it. Repeat this step for each additional audio drive.

SOFTWARE RELEASE NOTES

Release 3.08 Contact Support: (800) 776-1356

August , 2001

What's New in Version 3.08?

192 KHz Audio

You can now record at 192 KHz using RADAR's Super-Nyquist audio cards.

Bugs Fixed in Version 3.08

Canceling Backup Doesn't Reload Original Project

Canceling a backup at the point where the size of the backup is shown (before it actually starts backing up) was sometimes causing another project's audio to be overlaid onto the current project. This has been fixed in version 3.08.
