

IZ SUPPORT

Firmware Upgrade

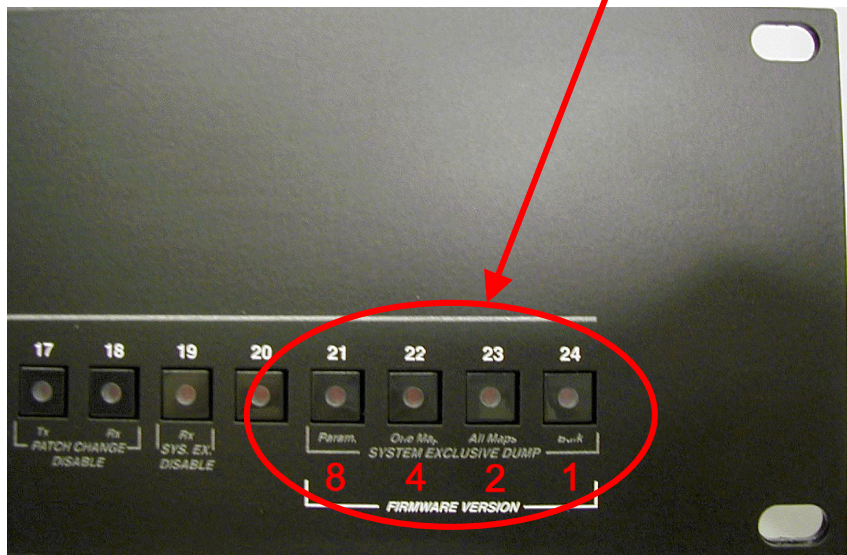

Applies to: UFC-24®

Contact iZ Support: (800) 776-1356

Memo Date: February 24, 2001

Why upgrade?

- You have two UFC-24's and are having problems linking them together.
- Determine which version of firmware you have on each unit. To do this press and hold the output button.
 - The last four buttons on the very right (labeled 21-24) indicate the current version. The display is in binary. If they're different an upgrade is required. Contact iZ Tech Support 1-800-776-1356 to order an upgrade chip(s).

3. The chip you need to replace is the only socketed chip on the circuit board.
4. Remove this chip using the provided chip puller.
5. Install the new chip, place chip on socket, align slanted corner of chip with slanted corner of the socket, press firmly and evenly on 2 sides of chip to insert it in the socket.
6. Repeat step 1 to confirm the chip was installed correctly.
